

Let us raise Earth instead of razing Earth.

Generation Restoration is a global movement aimed at **restoring ecosystems** for the benefit of people and nature. It's about restoring damaged environments—forests, grasslands, oceans, and urban areas.

The Earth is dying slowly. Trees are being deforested, oceans are polluted, animals are dying, global warming is escalating, and the ozone layer is depleting. So why should we sit back and watch this happen to our planet? It is up to us, the youths, to fight for the restoration, uplifting, and preservation of this very planet. We are the future of tomorrow.

Let us rise my people, let us rise together as one, let us unite! Let us stand for what is right! so that in the future when we look back we will not regret the outcome of what the planet could become.

We can fix this if we come together to raise the Earth, to restore it. The change starts from within us. I believe in myself, my friends, and in youths. We symbolize hope for this world. My fellow youths heed my word for the future of the world, our home lies in our very hands.
