

Generation Restoration: Shaping the Future

They say it takes a village to raise a child.

But I believe it takes just one informed and reformative person to change that village - and maybe even the world.

As a global community, let us recognize the urgent need to rewrite the story of how we treat the earth.

Environmental damage is not just hurting the planet;

it is affecting us - our homes, livelihoods, safety and security and overall, our health.

The earth cries and if she could speak in words, she would say: "Man, let me breathe."

Trees are being cut down without being replanted,

Pollution is rising, animals are losing their homes, all for what?

We have advanced in technology, yet somehow, lost touch with nature.

The power to restore our planet is in our choices, voices & actions.

Restoration begins with awareness.

I start where I am, educating children in my school, inspiring my community to care.

We have become little Earth helpers: planting trees, reducing waste, recycling - with purpose.

These are not insignificant actions, they are earth transformation actions.

Generational restoration is more than a theme,

Let's allow the Earth breathe again,

Start where you are,

You have what it takes!
