

POEM

GENERATION REFORMATION; SHAPING THE FUTURE AGAINST CLIMATE CHANGE.

We're one generation, United and bonded. Shaping the future of where we belong. Climate change, a challenge we face, but together, we will find a solution that will be fair.

We'll harness the sun, we'll harness the wind, renew energy for a future design. We will reduce, reuse and recycle wastes to restore our planet and make it thrive forever.

We'll plant seeds of hope, we'll nurture the earth, preserving nature's beauty, giving it new birth. We'll work together as one global team, for a future so bright, sustainable and grand

We're all change changers, guardians of the earth, shaping the future for everyone. Let's rise up, let's take a stand, for a world that is green.

Shaping the future for everyone, let's rise up, let's take a stand, for a world we can breathe in.
