

## June 5th: A Celebration of Filth

From far away you can hear beautiful sounds and celebration  
Words of thanks, melodies and sweet sensation  
For mother nature, the earth and our environment  
Oh! How great, only if our actions match this demonstration

Children wake up early, fetch water in distress  
While dirty streams flow, causing sickness in flesh  
No toilets means diseases spread without a dash  
Communities cry for help, they need proper WASH

Plastic bottles block our gutters every day  
Rain comes down but water cannot flow away  
Streets get flooded, homes are swept like trash  
This rainy season shows us nature's clash

But wait! These plastics can build toilets strong and bright  
Communities on the way to make it right  
Use waste plastic to solve sanitation need  
One problem solves another - smart indeed!

Dear Comrade,  
From Aleyitta to Badagry, let's unite as one nation  
Together we can build a better destination  
We don't have to wait for aid from UNICEF  
When you have me, you, and ourselves!

Let's raise our hands, wear gloves with action  
Let's cleanse Mother Earth with joy and dedication  
Not because we are forced, or need compensation  
But because we are on a journey to generational restoration
