

Shaping Our Future

The forest is beautiful

Emerald canopies whisper secrets to the wind

While sunlight dances on dew-kissed leaves

THE BEAUTY OF NATURE remain if we can join hands together

To make this happen!

Day by day we hear of increase in global warming

What do you do?

Do you just sit down there

And say it's none of my business

Instead Lets put our hands together

To make this happen!

The beauty of nature reminds me of Julia butterfly hill

Just because of nature

She lived on top of a red wood

Tree.

Could you have done that?

She stayed there for 738days

So incredible

And she made it happen!

What about the 15 years old

Girl "Greta Thunberg".

Who movement against climate crisis stood out

Could you address the world leaders at the UN climate action summits the way she did?

That was spectacular

She also made it possible!

What could have happened if they didn't stand?

Could you say?

Finally, the Trillion Trees Campaign came into the picture

Though Wangari Maathai

Wow! Finally its happening

Thank God we now have over

14 billion trees planted world wide

Indeed she is making it possible!

Lets join hands To make this project successful

Let's restore nature

WE can make it possible
