

Generation Restoration Shaping Our Future

By Osaze Izevbaye

Year 4

The Priory Preparatory School

Generation Restoration might sound like two big words, but it's simple! **Generation** means people living now (children and young people). **Restoration** means fixing something that is broken. Our planet is like a big home for people, animals, and plants, but we have hurt it by polluting the air, cutting down trees, and making oceans dirty.

Generation Restoration is about children and adults working together to fix the Earth and make it beautiful again. 🌍💚

How do we help?

- 🌳 Planting trees = cleaner air
- 🏖️ Cleaning beaches = safer oceans
- ♻️ Using less plastic = cleaner planet
- 💡 Turning off lights = saving energy
- ♻️ Recycling = less waste
- 🚰 Using less water = protecting rivers and lakes

I believe kids like me can help make a big difference! We can talk to friends, join clean-up projects, and remind our families to care for nature. When we take care of the Earth, it takes care of us by giving us food, water, fresh air, and a safe place to live.

If we all do our part, we can build a greener, cleaner, and happier future with clean oceans, green forests, and animals living in peace. Let's be heroes for the Earth! 🦸‍♂️
