GENERATION RESTORATION : *SHAPING OUR FUTURE!*

I hear the Earth whispering...

Not in rage, but in pain

The quiet ache of a tree that used to be,

Of oceans that can't breathe,

Of air heavy with what we forgot to care for.

But guess what?

We're done pretending.

We are Generation Restoration

Not just a name, but a mission.

We won't watch the world fall apart

And call it fate.

We are the fire in young feet,

The calm in a farmer's hands,

The voice of a child crying, "Do better!"

No capes, just gloves, shovels, seeds, and truth Restore the land.

Clean the stream.

Plant the tree.

Leave no one behind.

This isn't charity.

It's justice.

We don't want to survive

We want to thrive.

To breathe green,

To swim free,

To walk forests and hear the future whisper:

"Thank you."

We are the bridge between loss and hope,

Mending with every action,

Creating with every voice.

Restoration is not a dream

It's a decision.

We are not the last hope

We are the first light.

We are Generation Restoration.

And the future starts now.
