

### **Heal The Land: The Call for Generation Restoration!**

“Heal the World, Make it a better place, For you and for me and the entire human race” - Michael Jackson. When this song was released, it posed the biggest challenge no one ever expected, which till today, has never been resolved, especially in our country, Nigeria. From the constant floods in the Middle Belt, to the never-ending rising sea levels in Lagos, our climate continues to deteriorate, piece by piece, but everyone stays apathetic to this unseen problem when in fact, it is a MAJOR crisis caused by human activity.

This is where the final piece comes in - **Generation Restoration**. These two powerful words remind us that no matter how small, we youths, the ‘generation’ of tomorrow, need to be the first to take those bold, encouraging steps towards making not only our country’s ecosystem an attractive landmark but also spreading the awareness across the globe. Little gestures such as picking up trash, recycling and enlightening citizens are living proof that simple actions our generation does can attract the greatest blessings upon our environment.

Therefore, according to the great Greta Thunberg, “We are never too small to make a difference.” - We are the next generation, and the betterment of the Earth **begins with us**.
