GENERATION RESTORATION: SHAPING OUR FUTURE

The world is watching, and time is running out. Climate change looms on the horizon as a catastrophe from which there may be no recovery. With rising temperatures, heat waves, intense floods and more frequent extreme weather conditions a constant reminder that we can no longer rest easy. As young adults, our generation is well-positioned to shape the future. The urgent question is: What kind of future shall we shape?

Our actions as individuals, when combined, can amount to substantial change positively. We can create awareness about climate change and environmental sustainability, reduce our carbon footprint, protect our natural ecosystems, green the earth via afforestation, invest in renewable energy, and advocate for climate policies.

The time for action is now. We need to unleash the vast potential, energy, talent, creativity and determination of our people. All levels of government, businesses and people must partner in the chase for sustainability and lower emissions. We owe it to ourselves, our children and the planet to act with urgency and purpose. The world needs our enthusiasm and our energy. Let us heal the earth and preserve a greener future.
